LIKO-S, a.s.
U Splavu 1419
Slavkov u Brna
Czech Republic

Myjava,
December 11, 2007

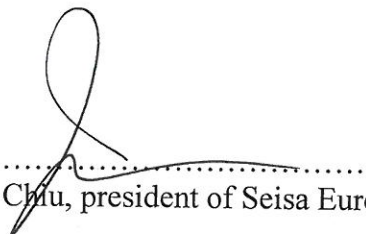

Cause: Reference

This year L Co. From Savkov u Brna finished our project, Seisa Europe - Slovakia, the construction of our new production facility in Myjava, Slovakia.

We chose LIKO-S because they provided us a reasonable and detailed proposal with specific numbers, acceptable conditions and good price. The entire project, which included an administration hall, was finished within the agreed time of five and one-half months.

We were very satisfied with the dedication and craftsmanship of the LIKO-S employees and supervisors. The work quality at all times was up to our standards, the contract time was adhered to, and their assistance with changes or any problems was always done to our satisfaction.

I sincerely recommend this firm to assist you in the realization of your project.

.....
Julio Chiu, president of Seisa Europe
